

MY COUNTRY-NATION COMES FIRST

We are the fortunate Indians

Nurtured among Subash Bose & Gandhians

Nourished in the cradle of ~~fauna~~ flora

Bewildering nature and exotic fauna

We cherish the lush green valleys

Scenic beauties in every journey

Serpentine rivers & sparkling waters

Snowclad peaks with whitish lustre

Of late we have become morons

Cutting trees & turning greedy demons

Exploiting India for selfish gains

Adversely impacting summer, winter and rain

Cultivating pollution, enhancing weapon race

Building concrete jungles & depriving breathing space

Time to return back to India's lap

Grow trees where we can have a nap.

Bury feud and cultivate brotherhood

Recap our natural memories & childhood

Our country is our pride

Never part it from our stride
