

IMPORTANCE OF SCHOOL - MISSING SCHOOL OR NOT

by Aksa Arman

"School is very important". School which is sacred like a shrine. In India after a holy place school is the one which are respectful. School is a temple of education. School is where basic education starts and led to the higher education. In school students are not only studying, course subjects, which are important for academic year but also focusing on their co-curriculum activities over all personality development. We also learn how to live a sustainable life. It's only the school which teaches us how to handle a problems. School also gives us a lesson of life, failure, success, brotherhood, friendship etc. School plays a great role in building up and shaping the rock into diamond i.e. students. School life is a handful years where students decide about their future.

Nobody can separate students with school but covid 19 which has totally changed students life, two years before, everything was perfect. Every morning, everyday was a new step to happiness. We used to wear uniform, have breakfast, went to bus stop, arrived at school, classes and games, we all have fun together. Specially in lunch time we used to share our tiffin play together etc. Now we have a habit of sitting in front of devices which have apps called zoom meeting, google classroom etc. This has changed the way we used to study before. It has merits like we do not have to carry heavy load of books and demerits like sometimes students and teachers both continuously stare and stare on electronic devices which can lead to myopia, headache, stress etc.

We now this pandemic is natural it comes every hundred years. Life is full of bitter and sweet moments. Not only students but everyone in the world are suffering from this pandemic. We have to deal with problems in our life. We should always let go the hard time this is what life is we hardly go to school. Virtual classes is the alternative method to this problem. We all are missing school.
