

“ Independence Day celebration During ‘Covid -19’ ” .

Independence Day means the day of independence ,an important day for our country India. On this day ‘15 August 1947’ we were freed from the shackles of British independence and mother India.

Today we are celebrating independence Day in the Covid period under adverse circumstances which has a different specialty. We should never forget how many mothers lost their lap to set freedom? How many sisters have lost their Rakhi? How many demanded vermilion?

How can we forget their sacrifice Remembering their sacrifices relentlessly, we can pay tribute to them only by maintaining over loyalty and love for the country.

Today we are celebrating the 75<sup>th</sup> anniversary of independence in the face of adversity in the Covid period . First of all, bow down to those Real heroes. Who have faithfully performed their duty even in this critical situation Among them are our doctors, nurses, sanitation workers, crew ,grocery store, and some vigilant medical and information institutions and our hard working ‘ Annadata farmers’ and laborers who deserve thanks .

How many have lost their father in this pandemic too. How many brothers have lost their sisters how many have lost their mothers, we must salute the sacrifices of all of them today. Even in this critical situation he gave his service, wishing for the health of all the people instead of his danig. This is his greatest patriotism. This year the independence day celebrations will be celebrated virtually only through limited public participation. Let us take a pledge on the auspicious occasion of independence day that through our behavior, Duty loyalty and commitment towards the country, we will definitely get rid of this invisible pandemic and we will be successful it .

“ will not let the sacrifices of immortal martyrs go in vain .

We will not allow heat to come on this holy land of ours.”

Thanks ,Jai hind – jai bharat ,vande matram..
