Topic : World United Against Corona

You know what covid-19 is all about,  
And it is also hard to move out.

Covid-19 is a infection,  
Where all objects are helpless, like injection.  
This is not a situation to be careless,  
Because our life is precious.

We can't touch,  
But we still reach out.

Weeks and weeks of isolation,  
But still infinite and invincible determination.

If we feel we are in total control,  
Does this not take a harder toll.

Unable to see friends and family,  
Stay safe and stay healthy.

All we need is to be careful  
Handle the situation careful.

It might be pandemic now here,  
But this doesn't last forever.

Be smart, be prepared,  
Be safe, be informed.

The doctors and nurses are working day and night,  
To remove our fright.

Thank you nurses and doctors,  
For being our protectors.

Let's take good care of each other,  
And we will get through this, together.
