

## HOW DO YOU SEE INDIA IN THE NEXT 20 YEARS?

Great changes are being made,  
But till India reaches her full potential it's still a long wait.  
Improvements in the coming two decades that I perceive,  
According to me are below for you to conceive.

All trips will be done through Air Trams,  
To save our roads from Traffic Jams.  
Currency Notes have to be taboo,  
And plastic money will make us do yahoo.

Electric Bombs will make festival of Diwali green,  
And make our environment evergreen.  
Vertical gardens shall take India by storm,  
So that the beautiful nature can perform.

Indian foods are delectable,  
Then why not take them to the next level?  
Food capsules will satiate our hunger,  
And remove the requirement of licking our finger.

Solar cars will appear,  
All polluting vehicles will disappear.  
House hold chores will be done by robots,  
Who will then be our laborious escorts.

People will start a drive named 'More Progression, Less Superstition',  
So that no one practices delusion.  
I hope that India will be all safe and sound,  
With educated people all around.
