

World United Against Corona

We are the member of our mother Earth,
We all live together like a family,
We all live with pride and humility,
With each other.

We are currently facing a pandemic,
Which has differentiated and removed,
The Unity between us,
But we need to face it together and bring unity back

Salute the Doctors and Nurses all around world,
Who are protecting and saving our lives.
Salute the Members of Police and Cleanliness Department
Who are working day and night to protect us.

They are the true warriors,
Who are working by putting their lives on risk,
Just to save yours and your family's life,
As they feel that it is their job to do so.

The world together with all countries,
Have defeated many battles against viruses,
And this is also just a virus,
Which will also be defeated soon.

This Pandemic has shocked and changed,
Our lifestyles and the way we live,
And now it's our time to,
Kick it out from our lives,
By following some logical steps,
To maintain distance and sanitation,
And more steps to kill it.
