

The Missile Man of India

Listen oh listen! My beloved folks.

A saga of a great man.

A man of dream and vision.

Has made the world his fan.

Born in holy Rameshwar.

Named as APJ Kalam at birth.

A man of superb obstinacy
faced all challenges with laughter and mirth.

A poverty stricken lad he was.

But had a quest to learn and gain.

He Aimed for aerospace scientist;

Had stupendous ideas in his brain.

Always aspired for profitability

No failure in the world could stop him;

Started working at the ISRO;

Rohini satellite was deployed by him.

5 missile projects Prithvi, Trishul, Agni, Akash and Nag

Were developed by dedication

Oh! What a contribution they were;

Earned him the title “missile man of the nation.”

A scientific advisor to the defense minister;

Served as the president of the nation;

A man full of life and right advice;

And he worked without any reservation.
